ZOHO HACKATHON | Team Leader Nov 22

Name : *PETTER*

- It is an community platform only for pet lovers. So it has channels for all dog types and single react messenger for this community,
- With this message feature we can connect Petter to organise an event and co-operate future collaboration,
- This message feature is developed using Socket IO

WORKS

[MUSIFY](#) | React, Hooks, Node js, Express & MySQL

Nov 22 – Current | <https://github.com/LokeshKumar-Dev/Musify>

It is an music listening web application only for pc, tab and horizontal smart phone for now. We can upload and listen music.

It has feature of creating playlist of yours from YouTube playlist and Spotify playlist

[Tracker](#) | Flutter

Mar 2017 | <https://github.com/LokeshKumar-Dev/Tracker>

As we know from the name, it an tracking application that is centred on a single server on there own choice users

It doesn't store data on one server. The user can store it on his own storing database with there credentials.

Petter | Catalyst webpack(Zoho), React, Node js, Express js & Socket IO

Oct 22 – Nov 22

It is an community platform only for pet lovers. So it has channels for all dog types and single react messenger for this community,

With this message feature we can connect Petter to organise an event and co-operate future collaboration.
